Investment Strategy	
<ul style="list-style-type: none"> • The ILP Sub-Fund and the Underlying Fund share the same investment strategy. • The Underlying Fund will be actively managed, investing primarily in global equities and focusing on companies whose core business, in the opinion of the Investment Manager, aims to generate positive social and/or environmental change alongside a financial return. • The Underlying Fund will seek to identify the universe of these companies based on three primary impact categories: life essentials, human empowerment, and the environment; and within these categories across one or a combination of Impact Themes such as sustainable agriculture and nutrition, clean water and sanitation, health, affordable housing, education and jobs training, financial inclusion, digital divide and cybersecurity, alternative energy, resource stewardship, and resource efficiency. The Underlying Fund may hold concentrated positions within an Impact Theme and is expected to have a natural bias towards small to mid-capitalisation companies that are experiencing strong growth. Whilst the Underlying Fund will generally be well diversified by country, currency, industry and issuer, it may hold positions that are concentrated in this manner from time to time. The Underlying Fund will generally invest in developed countries and may invest up to 40% in emerging and frontier markets. • Underlying Fund will invest in shares and other securities with equity characteristics such as preferred stocks, convertible securities or depository receipts. The Underlying Fund may invest either directly or via derivatives. • Derivatives may be used to hedge (manage) risk and for investment purposes (such as gaining exposure to a security). 	<p>Refer to <i>Sec 6 – Investment Objectives, Focus and Approach</i> of the FIB for further information on Investment Strategy.</p>
