Investment Strategy

- The Underlying Fund invests in a diversified range of eligible global assets including but not limited to equities (and equity-related securities), bonds, currencies and cash and its equivalent.
- Exposure to the asset classes will be primarily through: direct equity and fixed income/debt securities (including sovereign debt, high yield securities, CMBS, ABS, MBS and convertible bonds), units of undertakings for collective investment, exchange traded funds, money market instruments and index futures.
- In addition, the Underlying Fund may invest in swaps, total return swaps, options and foreign exchange forwards, each of which may be traded through recognised exchanges or via the over-the-counter markets. The aggregate exposure in swaps, total return swaps, options and foreign exchange forwards is generally expected to be less than 30% of the Underlying Fund's net assets, but may be up to 50% of the Underlying Fund's net assets under certain circumstances (e.g. when the derivative market offers greater-than-normal opportunities for higher returns or there is a high risk of market downturn). The Underlying Fund may also invest up to 10% in aggregate of its net assets in Alternative Asset Classes. This investment objective of the Underlying Fund may also be achieved through investments in unlisted collective investment schemes and other sub-funds.
- The Underlying Fund may invest up to 100% of its net assets in fixed income/debt securities rated below investment grade.
- The Underlying Fund is not subject to any limitation on the portion of its net assets that may be invested in any one country, sector or any companies with a particular market capitalisation. Subject to the above strategy, from time to time, the Underlying Fund may invest more than 30% of its net assets in any one single country or region globally, such as the US.
- The Underlying fund may invest up to 100% of its net assets in fixed income/debt securities rated below investment grade. The Underlying Fund may also invest up to 5% in aggregate of its net assets in Distressed Securities and Defaulted Securities. The Underlying Fund may invest less than 25% of its net assets in debt instruments with loss absorption features out of which up to 5% of its net assets may be invested in in Contingent Convertible Bonds ("CoCos") with loss absorption features (such as Additional Tier 1 capital and Tier 2 capital instruments with mechanical triggers (i.e. debt instruments with write-down or conversion into equity features with pre-specified triggers)) and up to 20% of its net assets in non-preferred senior debt and other subordinated debts with loss absorption features.
- The Underlying Fund is not subject to any limitation on the portion of its net assets that may be invested in any one country, sector or any companies with a particular market capitalisation. Subject to the above strategy, from time to time, the Underlying Fund may invest more than 30% of its net assets in any one single country or region globally, such as the US.
- The Underlying Fund does not have a specific ESG or sustainable investment objective, however in evaluating and researching securities within the investment process ESG factors are considered.
