- **You may not be able to perform a withdrawal of units during any period where dealing is suspended.**
 - There may be a 10% limit on the number of units of an Underlying Fund/Underlying Entity that can be realised and converted on a Dealing Day. Therefore, your realisation request may be deferred to the next Dealing Day if realisations exceed the limit on that day. Your right to withdraw units may also be temporarily suspended under certain circumstances.

In addition, interest payments on ABS (other than most senior tranche of an issue) are generally subject to deferral. ABS Assets are usually illiquid in nature and are subject to risks, including market, credit and interest rate risk. The aggregate return on the ABS Assets will depend in part upon the ability of the relevant investment manager to actively manage the related portfolio of the ABS Assets.
 - The risk of ABS applies to MBS.
- **You are exposed to concentration risks.**
 - The ILP Sub-Fund may primarily invest in a limited number of countries which will carry higher concentration risks than a diversified fund.
