# How PRUcash secure works:

Mr Lim, non-smoker, age 40 on his next birthday, wants to save up for a comfortable future. It's also important to him that he has access to yearly cash payouts for his personal needs.

**Note:**

\*The illustrated values use bonus rates assuming an illustrated investment rate of return of 4.75% per annum for the participating fund. At 3.25% per annum illustrated investment rate of return, the non-guaranteed benefit is \$15,378 and the Total Benefit is \$84,178. As bonus rates are not guaranteed, the actual benefits payable will vary according to the future performance of the participating fund.

**Important Notes:**

You are recommended to read the product summary and seek advice from a qualified Prudential Financial Consultant for a financial analysis before purchasing a policy suitable to meet your needs.

As buying a life insurance policy is a long-term commitment, an early termination of the policy usually involves high costs and the surrender value, if any, that is payable to you may be zero or less than the total premiums paid.

Buying health insurance products that are not suitable for you may impact your ability to finance your future healthcare needs. Premiums for the supplementary benefits are not guaranteed and may be adjusted based on future claims experience.
