## STATISTICAL DATA (CLASS A USD)

	5 Years
Volatility	5.16%

#Past performance is not indicative of future results. Performance calculation are based on a single pricing basis, include the change in Net Asset Value and reinvestment of any distributions paid on Portfolio shares for the period shown, net of assumed front-end load (FEL) 2.5% for Class A/AT shares. For Class A/AT shares, maximum front-end load (FEL): Up to 5%. Accordingly, these figures do not represent actual returns to an investor. Performance quoted in currencies other than the base currency of the Portfolio is calculated by converting the daily Net Asset Value of the Portfolio using a spot foreign exchange rate of the other offered currency on each valuation point. Returns denominated in a currency other than that of the fund may increase or decrease as a result of foreign exchange currency fluctuations. The information on this page is for informational purposes only and should not be construed as an offer to sell, or solicitation of an offer to buy, or a recommendation for the securities of the Portfolio.

<sup>1</sup> The Portfolio is part of AB FCP I (referred to as "AB"). AB is a mutual investment fund (fonds commun de placement) organized under the laws of the Grand Duchy of Luxembourg. Prior to 5 February 2016, AB's legal name was ACMBernstein, its trading name was AllianceBernstein.

<sup>^</sup> Net Asset Value is denominated in the share class currency.

<sup>^^</sup> Credit Quality is a measure of the creditworthiness and risk of a bond or portfolio, based on the issuer's financial condition. For purposes of this document, all ratings are based on ratings of S&P, Moody's and Fitch: AAA/Aaa is highest and D is lowest. **Conventions for split ratings:** Sector Allocation/High Yield uses a split to lower with two different ratings (and a split to middle for three ratings); Credit Quality uses a split to higher. Therefore, information contained herein may be different where the Prospectus requires a different split ratings convention or, where the Prospectus does not specify, AB applies its own split ratings convention.

Where applicable, stand-alone currency symbols represent convenience pricing, which offers the ability to purchase or redeem shares using the currency indicated, which is then converted into the base currency of the portfolio using a market rate at the time of purchase or redemption. Convenience pricing involves no currency hedging and does not seek to provide any protection from currency fluctuations.

Currency-hedged share classes use hedging techniques in an attempt to reduce—but not eliminate fluctuations between the investor's holdings in a particular currency-hedged share class denominated in the investor's investing currency and the portfolio's base currency. The goal is to deliver returns that track the portfolio's base currency returns more closely.

**Investment in the Fund entails certain risks.** Investment returns and principal value of the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund is meant as a vehicle for diversification and does not represent a complete investment program. Some of the principal risks of investing in the Fund include country risk, currency hedged share class risk, emerging markets risk, currency risk, illiquid assets risk, portfolio turnover risk, management risk, derivatives risk, borrowing risk, taxation risk, fixed income securities risk, interest rate risk, lower rated and unrated investments risk, prepayment risk, sovereign debt obligations risk, corporate debt risk and lower- or unrated securities risk. The portfolio may invest in financial derivative instruments for investment purposes in addition to hedging and/or efficient portfolio management purposes and hence this may lead to a higher volatility to the net asset value of the Portfolio. These and other risks are described in the Fund's prospectus. Prospective investors should read the prospectus and Product Highlights Sheet carefully and discuss risk and the fund's fees and charges with their financial adviser to determine if the investment is appropriate for them.
