## What are the risks specific to this fund?

- This fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.
- The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.
- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- Any security could become hard to value or to sell at a desired time and price, increasing the risk of investment losses.
- The Fund's value may fall where it has concentrated exposure to a particular industry that is heavily affected by an adverse event.
- The Fund may invest in real estate investment trusts which can involve different risks to investing directly in the underlying assets. Such schemes may increase risk due to factors such as restrictions on withdrawals and less strict regulation. The value of your investment may fall as a result.
- Changes in currency exchange rates may cause the value of your investment and any income from it to rise or fall.
- If the Fund or a specific share class of the Fund seeks to reduce risks (such as exchange rate movements), the measures designed to do so may be ineffective, unavailable or detrimental.

## General risks

- Past performance is not a guide to future performance.
- The value of an investment and income can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.
