KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- ▶ You are investing in a sub-fund of BlackRock Global Funds (“BGF”).
- ▶ BGF is an open-ended investment company incorporated in Luxembourg and its home regulator is the Commission de Surveillance du Secteur Financier (CSSF).
- ▶ Non-Distributing Shares do not pay dividends whereas Distributing Shares pay dividends
 - For Distributing (G), (R) and (S) Shares (if available): (i) dividends may come from capital of the Fund; (ii) this may reduce capital and the potential for capital growth of the Fund, and (iii) similar to other Distributing Shares, there is no guarantee of payout and the dividends may rise or fall.

Refer to “The Company” and “The Funds” on page 3 of the Singapore Prospectus for further information on features of the product.

- ▶ The Fund invests at least 70% of its total assets in the equity securities of companies domiciled in, or exercising the predominant part of their economic activity in, emerging European or Mediterranean countries.
- ▶ The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

Refer to “Investment Objective, Policy and Strategy” and “Use of Derivatives and Securities Lending” on pages 8 to 44 and 54 to 58 of the Singapore Prospectus for further information on investment strategy.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The price of Shares of the Fund and any income from them may fall as well as rise.

These risk factors may cause you to lose some or all of your investment.

Refer to “Risk Factors” on pages 46 to 50 of the Singapore Prospectus for further information on risks of the product

Market and Credit Risks

The Fund may be subject to Currency Risks

- ▶ Foreign currency exchange rate movements are likely to influence the returns to investors in Singapore, hence investors may be exposed to exchange rate risks.
- ▶ For Hedged Share Classes, while the Fund attempts to hedge currency risks, there can be no guarantee that it will be successful in doing so.

The Fund may be subject to Emerging Market Risks

- ▶ The Fund may invest in one or more emerging markets (including emerging European/Mediterranean countries) and may be subject to a higher than average volatility than investing in more developed markets due to greater political, tax, economic, social, foreign exchange, custodial, liquidity, regulatory or other risks.

The Fund may be subject to Foreign Investment Restrictions Risks

- ▶ Some countries prohibit or restrict investment, or the repatriation of income, capital or the proceeds from sale of securities. The Fund may incur higher costs investing in these countries. Such restrictions may delay the investment or repatriation of capital of the Fund.

The Fund may be subject to Equity Risks

- ▶ The values of equities fluctuate daily and can be influenced by many factors including issuer-specific factors and broader economic and political developments.

Liquidity Risks

- ▶ Trading volumes in the underlying investments of the Fund may fluctuate significantly, due to factors including market development, market sentiment or regulatory/government intervention. An inability to readily sell investments at the desired time or price may negatively impact the Fund.
- ▶ Redemptions may be suspended in certain circumstances detailed in the Prospectus.

Product Specific Risks

The Fund may be subject to Derivatives Risks

- ▶ The use of derivatives may expose the Fund to a higher degree of risk. Derivative contracts can be highly volatile and a relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities. Leveraged derivative positions can hence increase the Fund's volatility. The Fund may sustain loss as a result of the failure of a derivatives counterparty to comply with the terms of the derivatives contract.

The Fund may be subject to the risks of Securities Lending

- ▶ The Fund may engage in securities lending. As such, the Fund will have a credit risk exposure to the counterparties to any securities lending contract. The Fund's investments can be lent to counterparties over a period of time. A default by the counterparty combined with a fall in the value of the collateral below that of the value of the securities lent may result in a reduction in the value of the Fund.

The Fund may be subject to Smaller Capitalisation Companies Risks

- ▶ The Fund may invest in small cap companies. Such investments may have higher than average volatility and liquidity risks.
