KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of the product and its distributions (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:

Refer to Section 10 on Pg 45 of the Singapore Prospectus for further information on risks of the product.

Market and Credit Risks

- **You are exposed to portfolio risks of an equity fund and market risks in Asian Pacific (ex-Japan) markets.**
 - o The Sub-Fund is an equity fund and will be subject to risks such as fluctuations in market prices, adverse issuer or market information. The value of the Sub-Fund may also go up or down due to normal market fluctuations in the Asian Pacific (ex-Japan) markets that the Sub-Fund invests in.
- **You are exposed to emerging markets risks.**
 - o The Sub-Fund may invest in emerging markets which involve a greater risk of loss and are more volatile than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity, volatility and regulatory risks.
- **You are exposed to currency risks.**
 - o As the Sub-Fund's investments may be denominated in currencies that differ from the currency of the share class held by you, fluctuations in the exchange rates of these foreign currencies may affect the income and value of your shares.
 - o If you are invested in a share class that is not denominated in SGD and your reference currency is SGD, you may be exposed to additional exchange rate risks.
- **You are exposed to the risks of currency hedging transactions for a hedged share class.**
 - o The hedging strategy is to reduce but not eliminate currency risk. If these hedging transactions are imperfect or are only placed over a portion of the foreign exchange exposure, such share class will bear the resulting benefit or loss.
 - o It is important to note that currency hedging transactions for one share class may in extreme cases adversely affect the NAV of the other share classes within the Sub-Fund.
- **You are exposed to counterparty risks.**
 - o The Sub-Fund will be exposed to the credit risk on counterparties with which it trades and any default by such counterparty (for example, due to insolvency) could result in substantial losses to the Sub-Fund.
- **You are exposed to liquidity risks of the Sub-Fund's investments.**
 - o The Sub-Fund may have investments which have high liquidity risks (for example, low trading volumes) and may incur substantial losses if it is unable to sell these investments at opportune times or prices.

Liquidity Risks

- **The Sub-Fund is not listed and you can redeem your shares only on Business Days.**
 - o There is no ready secondary market for the Sub-Fund. All redemption requests should be submitted in the manner set out in the Singapore Prospectus.
- **Your redemption request may be deferred or suspended.**
 - o There may be a 10% limit on the number of shares that can be redeemed and converted on a Valuation Day. Therefore, your redemption request may be deferred to the next Valuation Day (which is subject to the same limit) if redemptions exceed the limit on that day.
 - o Your right to redeem shares may also be temporarily suspended under certain circumstances as described in the Singapore Prospectus.

Product-Specific Risks

- **You are exposed to derivatives risks.**
 - o The Sub-Fund may use derivative instruments, such as options, swaps, forward contracts and futures contracts, for efficient portfolio management and/or hedging purposes.
 - o Derivatives involve risks different from, and, in some cases, greater than, the risks presented by more traditional securities investments. Some of the risks associated with derivatives are market risk, management risk, credit risk, liquidity risk, operational risk and leverage risk.
- **You are exposed to risk of investing in China A-shares through China-Hong Kong Stock Connect Programmes.**
 - o The Sub-Fund may invest in China A-Shares through the China-Hong Kong Stock Connect Programmes which are subject to regulatory change, quota limitations and also operational constraints which may result in increased counterparty risk.

- The redemption proceeds that you will receive will be the redemption price multiplied by the number of shares redeemed, less any charge. There is currently no redemption charge applied to the redemptions. An example is as follows:
