### KEY PRODUCT FEATURES

#### WHAT ARE YOU INVESTING IN?

- You are investing in a collective investment scheme constituted in Luxembourg that aims to generate long-term capital growth through a concentrated portfolio of equities, equity-related securities and bonds of companies, which are incorporated, listed in or have their area of primary activity in Japan, as well as currencies.
- You may receive distributions as declared by the Board of Directors on a monthly basis if you invest in a share class with a subscript DM in its name, on a quarterly basis on or around January, April, July and October if you invest in a share class with a subscript DQ in its name, on a semi-annual basis on or around April and October if you invest in a share class with a subscript DH in its name and on an annual basis on or around January if you invest in a share class with a subscript DY in its name. **Distributions are not guaranteed.** The Board of Directors may at its discretion pay distributions out of either (a) income; or (b) net capital gains; or (c) capital of the Sub-Fund or a combination of (a) and/or (b) and/or (c). Such distributions will reduce the net asset value (“NAV”) of the shares. The Board of Directors may also vary the frequency and/or amount of the distributions made.

Refer to Section 1 on Pg 1, Section 3.1 on Pg 9 and Section 18.6 on Pg 50 of the Singapore Prospectus for further information on features of the product.

## Investment Strategy

- The Investment Manager screens a wide investment universe to form a concentrated portfolio of Japanese companies that are typically trading on low valuations relative to their history and the market. It applies disciplined and rigorous fundamental analysis during the selection process to ensure a high level of conviction around the valuation for each of the companies held in the Sub-Fund.
- The Sub-Fund is managed with a high Active Share which is consistent with a truly active management style where high conviction investment bets are taken without consideration of a benchmark. Active Share is a measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index.
- The Sub-Fund may also invest in depository receipts including ADRs and GDRs, convertible bonds, preference shares, warrants and fixed income securities issued by Japan entities.

*Refer to Section 3.1 on Pg 9 of the Singapore Prospectus for further information on the investment strategy of the product.*

### WHO ARE YOU INVESTING WITH?

- The Management Company: Eastspring Investments (Luxembourg) S.A.
- The Investment Manager and Singapore Representative: Eastspring Investments (Singapore) Limited
- The Depositary: The Bank of New York Mellon SA/NV Luxembourg branch

*Refer to Section 1 on Pg 1 and Section 2 on Pg 4 of the Singapore Prospectus for further information on the role and responsibilities of these entities.*

## KEY RISKS

### WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

**The value of the product and its distributions (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:**

*Refer to Section 10 on Pg 45 of the Singapore Prospectus for further information on risks of the product.*

## Market and Credit Risks

- **You are exposed to market risks in Japan market.**
  - The value of your investments may go up and down due to normal market fluctuations in the equity and bond markets in Japan that the Sub-Fund invests in.
- **You are exposed to currency risks.**
  - As the Sub-Fund's investments may be denominated in currencies that differ from the currency of the share class held by you, fluctuations in the exchange rates of these foreign currencies may affect the income and value of your shares.
  - If you are invested in a share class that is not denominated in SGD and your reference currency is SGD, you may be exposed to additional exchange rate risks.
- **You are exposed to the risks of currency hedging transactions for a hedged share class.**
  - The hedging strategy is to reduce but not eliminate currency risk. If these hedging transactions are imperfect or are only placed over a portion of the foreign exchange exposure, such share class will bear the resulting benefit or loss.
  - It is important to note that currency hedging transactions for one share class may in extreme cases adversely affect the NAV of the other share classes within the Sub-Fund.
- **You are exposed to counterparty risks.**
  - The Sub-Fund will be exposed to the credit risk on counterparties with which it trades and any default by such counterparty (for example, due to insolvency) could result in substantial losses to the Sub-Fund.
- **You are exposed to liquidity risks of the Sub-Fund's investments.**
  - The Sub-Fund may have investments which have high liquidity risks (for example, low trading volumes) and may incur substantial losses if it is unable to sell these investments at opportune times or prices.

## Liquidity Risks

- **The Sub-Fund is not listed and you can redeem your shares only on Business Days.**
  - There is no ready secondary market for the Sub-Fund. All redemption requests should be submitted in the manner set out in the Singapore Prospectus.
- **Your redemption request may be deferred or suspended.**
  - There may be a 10% limit on the number of shares that can be redeemed and converted on a Valuation Day. Therefore, your redemption request may be deferred to the next Valuation Day (which is subject to the same limit) if redemptions exceed the limit on that day.
  - Your right to redeem shares may also be temporarily suspended under certain circumstances as described in the Singapore Prospectus.

## Product-Specific Risks

- **You are exposed to country risks.**
  - As the Sub-Fund invests in a single country (i.e. Japan), it is exposed to the market, currency, political, regulatory and other risks related to the economy of that country.
- **You are exposed to derivatives risks.**
  - The Sub-Fund may use derivative instruments, such as options, swaps, forward contracts and futures contracts, for efficient portfolio management and/or hedging purposes.
  - Derivatives involve risks different from, and, in some cases, greater than, the risks presented by more traditional securities investments. Some of the risks associated with derivatives are market risk, management risk, credit risk, liquidity risk, operational risk and leverage risk.
- **You are exposed to concentration risks.**
  - Investors should note that the net asset value ("NAV") of this sub-fund is likely to have higher volatility due to its concentration of investment in a single country.

  - The NAV may be adjusted in accordance with the "Price Adjustment Policy" in section 2.4 of the Luxembourg Prospectus.
- You will normally receive the redemption proceeds within ten Business Days (or if any Business Day within such period is not a Valuation Day, such period as extended accordingly) following the Singapore Representative's receipt of the redemption request, subject to it being in order.
