KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a sub-fund of the Fund, an open-ended investment company organised as a société anonyme under the laws of the Grand Duchy of Luxembourg and qualifying as a SICAV and a UCITS.
- The Sub-Fund aims to provide long-term capital growth by investing primarily in companies of the emerging markets of the Middle East region.
- Periodic dividends, to be made available at the sole discretion of the Management Company, are intended to be paid in respect of the distribution share class, A (dist) – USD, of the Sub-Fund.

Refer to paragraphs 1 (THE FUND) and 2 (THE SUB-FUNDS) and the relevant Appendix (EMERGING MIDDLE EAST EQUITY FUND) of the Prospectus for further information on features of the product.

- The Sub-Fund may invest up to 20% of its assets in participation notes.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- Because the Sub-Fund is aggressively managed, volatility may be high as the Sub-Fund may take larger position sizes, may have high turnover of holdings and at times may have a significant exposure to certain areas of the market.
- Participation notes are exposed not only to movements in the value of the underlying equity, but also to the risk of counterparty default, which could result in the loss of the full market value of the participation note.
- Past performance is not a guide to future performance.
- The Sub-Fund may have a higher volatility to its net asset value due to its investment policy when compared to sub-funds investing in global markets, with broader investment policies and/or are a less volatile asset class.
- Investors should note that for the share class A (dist) – USD, dividends may in certain circumstances be paid out of the share class capital and reduce the net asset value of that share class.

Refer to paragraph 8 (RISK FACTORS) and the relevant Appendix (EMERGING MIDDLE EAST EQUITY FUND) of the Prospectus for further information on risks of the product.

Market and Credit Risks

YOU ARE EXPOSED TO MARKET RISKS

- The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions.
- Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency and greater financial risks. Emerging market currencies may be subject to volatile price movements. Emerging market securities may also be subject to higher volatility and lower liquidity than non emerging market securities.
- The Sub-Fund may be concentrated in a limited number of securities and as a result, may be more volatile than more broadly diversified funds.
- The Sub-Fund is hence exposed to the risks of concentration.

YOU ARE EXPOSED TO CURRENCY RISKS

- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that may be used to minimise the effect of currency fluctuations may not always be successful. Where a purchase involves a foreign exchange transaction, it may be subject to the fluctuations of currency values.
- The Sub-Fund may invest in assets denominated in any currency and currency exposure may not be hedged for the shares on offer in Singapore. In addition, the net asset value of the USD denominated Share Classes are not denominated in SGD. Accordingly, foreign currency exchange rate movements are likely to influence your returns, and you may be exposed to exchange rate risks.

Liquidity Risks

- The Sub-Fund is not listed and you can redeem only on a Singapore Dealing Day³.
- If the total requests for redemptions and switches out of the Sub-Fund on any Luxembourg Dealing Day exceeds 10% of the total value of Shares in issue of that Sub-Fund, the Management Company reserves the right to defer any redemption or switch requests in excess of 10% until the next Luxembourg Dealing Day. On the next Luxembourg Dealing Day, or Luxembourg Dealing Days until completion of the original requests, deferred requests will be dealt with in priority to later requests.

³ Please refer to paragraph 9 (DEALING) of the Prospectus for more information.

Product Specific Risks

YOU ARE EXPOSED TO DERIVATIVE RISKS

- The Sub-Fund may, within its prescribed limits, invest in financial derivative instruments for hedging purposes and for Efficient Portfolio Management.
- Participation in certain financial derivative instruments involves risks of a type, level or nature to which the Sub-Fund would not ordinarily be subject to.
- In an extreme scenario, investments made through derivative transactions may cause the investor to lose his entire principal amount invested.
