## KEY RISKS

### WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

**The value of the Fund and its distributions (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:**

*Refer to Para 7 of the Prospectus for further information on risks of the product.*

### Market and Credit Risks

#### You are exposed to market risk.

- The value of investments by the Fund may go up and down due to changing economic, political or market conditions, or due to an issuer's individual situation.

*Refer to Para 7.1 of the Prospectus for further information.*

### Liquidity Risks

#### You are exposed to liquidity risk.

- There is no secondary market for the Fund. All redemption requests should be made to the distributor of the Fund through whom you had originally purchased the Shares. The liquidity of the Fund may be limited if a significant portion of the assets of the Fund is to be sold to meet redemption requests in a short time frame. During this period, the portfolio allocation may be modified to prioritise liquidity. In difficult market conditions, the Fund may not be able to sell a security for full value or at all. This could affect performance and could cause the Fund to defer or suspend redemptions of its Shares.

*Refer to the "Important Information" section and Para 7.1 and 10.1 of the Prospectus for further information.*

### Product-Specific Risks

#### You are exposed to China country risk.

- Changes in China's political, legal, economic or tax policies could cause losses or higher costs for the Fund.

*Refer to Para 7.1 of the Prospectus for further information.*

#### You are exposed to counterparty risk.

- The counterparty to a derivative or other contractual agreement or synthetic financial product could become unable to honour its commitments to the Fund, potentially creating a partial or total loss for the Fund.

#### You are exposed to currency risk.

- The Fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

#### You are exposed to derivatives risk.

- The Fund may use derivatives as part of the investment process. The use of futures, options, warrants, forwards, swaps or swap options involves increased risk. The Fund's ability to use such instruments successfully depends on the Investment Manager's ability to accurately predict movements in stock prices, interest rates, currency exchange rates or other economic factors and the availability of liquid markets. If the Investment Manager's predictions are wrong, or if the

derivatives do not work as anticipated, the Fund could suffer greater losses than if the Fund had not used such instruments.

**You are exposed to emerging and frontier markets risk.**

- Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk.

**You are exposed to equity risk.**

- Equity prices fluctuate daily, based on many factors including general, economic, industry or company news.

**You are exposed to leverage risk.**

- The Fund uses derivatives for leverage, which makes it more sensitive to certain market or interest rate movements and may cause above-average volatility and risk of loss.

**You are exposed to operational risk.**

- Failures at service providers could lead to disruptions of fund operations or losses.

**You are exposed to distribution policy risk (only applicable to Distribution Classes).**

- In respect of a Distribution Class with fixed dividends, fixed dividends may be paid out of capital if investment income is less than the fixed dividend amount.
- In respect of a Distribution Class with variable dividends, the dividends are paid out of capital rather than out of investment income. Capital growth will be reduced and in periods of low growth, capital erosion may occur.
- Where dividends are paid out of capital of a Distribution Class, this will reduce the net asset value of the Distribution Class.

### HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

You may redeem Shares by completing a share redemption form ("Redemption Request") and submitting it to the relevant distributor through whom you originally purchased the Shares.

The directors of the Company reserve the right not to accept instructions to redeem (or switch) of more than 10% of the total value of the Shares in issue of the Fund on a Dealing Day. In these circumstances, the redemption of part or all Shares in excess of 10% will be deferred until the next Dealing Day.

The redemption proceeds are usually paid to you within 6 Business Days following the receipt of the Redemption Request by the Company or its administrative agent provided that the directors of the Company reserve the right to extend the period of payment of the redemption proceeds to such period, not exceeding 30 calendar days.

Your exit price is determined as follows:

- If you submit the Redemption Request by 5 pm Singapore time on a Singapore Business Day and such Redemption Request is accepted by the Management Company or its administrative agent by 1 pm Luxembourg time of the relevant Dealing Day, you will be paid a price based on the net asset value per Share on that Dealing Day.
- If you submit the Redemption Request after 5 pm Singapore time on a Singapore Business Day and such Redemption Request is accepted by the Management Company or its administrative agent by 1 pm Luxembourg time of the next relevant Dealing Day, you will be paid a price based on the net asset value per Share on the next relevant Dealing Day.

The redemption proceeds that you will receive will be the exit price multiplied by the number of Shares redeemed. An example is as follows:

1000	x	\$11.0000	=	\$11,000.00
(Number of Shares)		(Net Asset Value per Share)		(Redemption Proceeds)
