PRODUCT SUITABILITY

WHO IS THE PRODUCT SUITABLE FOR?

The Fund is only suitable for investors who:

- seek returns on their investments;
- are looking for exposure to the commodities industry; and
- are comfortable with the volatility and risk of a global equity fund which invests in this industry.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?		Refer to Para 7.1,
•	You are investing in a unit trust constituted in Singapore that aims to provide you with returns on investment mainly in securities of corporations (whether or not listed on any stock exchange, and in any part of the world) whose business is or is substantially in the mining or extraction of gold, silver or precious metals, bulk commodities, base metals of all kinds, and other commodities and it includes the mining or extraction of oil, gas, coal, alternative energy or other commodities or other minerals, and other authorised investments.	7.4 and 23.1 on Pg 5, 6 and 27 of the Prospectus for further information on features of the product.
•	We currently do not aim to make regular distributions for the Fund.	

¹ The Prospectus is available at our operating office at 80 Raffles Place, 3rd Storey, UOB Plaza 2, Singapore 048624 or through our authorised agents or distributors during normal business hours, or through our website at <u>uobam.com.sg</u>.

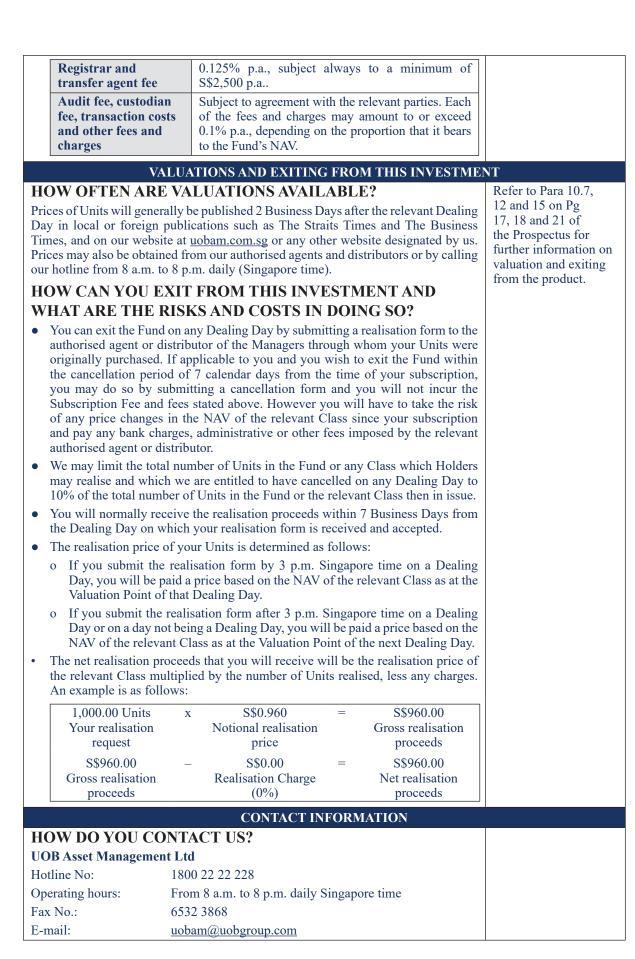

The NAV of the Fund is likely to be highly volatile due to the investment policies of the Fund and/or the portfolio management techniques adopted by us.

Investment Strategy				
 We intend to achieve the investment objective of the Fund by investing in companies that are competitive, well managed and offer attractive growth prospects over a multi-year investment horizon. These are likely to be leading industry leaders or globally competitive companies, which are found amongst mining predominant countries like Australia, North & South Americas, South Africa etc. The approach is to invest in industries which exhibit positive macro fundamentals and similarly companies which possess robust micro qualities While the main focus will be on long term growth, the Fund will only invest in companies where valuation levels can be justified. The Fund may use or invest in FDIs for the purposes of hedging existing positions in a portfolio, for efficient portfolio management or a combination of both purposes. 	Refer to Para 7.2, 7.3, 7.8 and 9.2.4 on Pg 5, 7 and 11 of the Prospectus for further information on the investment focus and approach of the Fund and its exposure to FDIs.			
Parties Involved				
WHO ARE YOU INVESTING WITH?	Refer to Para 2 to 4 on			
 The Managers are UOB Asset Management Ltd. The Trustee is State Street Trust (SG) Limited. The Custodian/registrar is State Street Bank and Trust Company, acting through its Singapore Branch. 	Pg 2 to 4 of the Prospectus for further information on these entities.			
• The sub-manager of the Fund is Investec Asset Management Singapore Pte Limited. The sub-manager has in turn delegated its investment sub-management of the Fund to Investec Asset Management Limited.				
KEY RISKS				
WHAT ARE THE KEY RISKS OF THIS INVESTMENT?	Refer to Para 9.1 and			
The value of the Fund and its distributions (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:	9.2 on Pg 9 of the Prospectus for further information on risks of the product.			
Market and Credit Risks				
 You are exposed to market risk in the global markets. Prices of securities that the Fund invests in may be affected by changes in economic conditions, interest rates and the market's perception of the securities which in turn may affect the value of your investment. You are exposed to equity risk as the Fund is an equity fund. The Fund may invest in stocks and other equity securities which are subject to market risks that historically have resulted in greater price volatility than that experienced by bonds and other fixed income securities. This may in turn affect the value or volatility of the Fund. 				
Liquidity Risks				
 The Fund is not listed and you can redeem only on Dealing Days. There is no secondary market for the Fund. All realisation forms should be submitted to our authorised agents or distributors. 				
• You are exposed to liquidity risk in the Fund's investments. o Investments by the Fund in some emerging markets often involve a greater degree of risk due to the nature of such markets which do not have fully developed services such as custodian and settlement services often taken for granted in more developed markets. There may be less developed legal and regulatory systems, a greater degree of volatility in such markets because of smaller market capitalisations, greater influence from foreign capital flows, higher retail participation which tends to be shorter term in nature and possibly the lack of liquidity.				
Product-Specific Risks				
• You are exposed to commodities risk. • The Fund currently does not use FDIs to gain exposure to commodities but may in the future do so, in accordance with the applicable provisions of the Code. The prices of commodities are influenced by, amongst others, various macroeconomic factors, climatic and geopolitical conditions, disease, and other natural phenomena, agricultural, trade, fiscal, monetary, and exchange control programmes and policies of governments and other unforeseeable events. The volatility of the Fund may be affected by the correlation between different commodities or classes of commodities to				

which the Fund is exposed. A higher correlation will have a greater impact

	the Fund and may subject the Fund to greater or more			
rapid fluctuations in va				
 You are exposed to political risk. The Fund's investments may be adversely affected by political instability as well as exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation of investments and other restrictions and controls which may be imposed by the relevant authorities in the relevant countries. 				
 You are exposed to derivatives risk. The Fund may use or invest in FDIs, including but not limited to, foreign exchange forward contracts, spot contracts (excluding spot commodities) and equity index future contracts. An investment in a FDI may require the deposit of initial margin and additional deposit of margin on short notice if the market moves against the investment position. If the required margin is not provided in time, the investment may be liquidated at a loss. Therefore, it is essential that such investments in FDIs are monitored closely. We have the controls for investments in FDIs and have in place systems to monitor the derivative
