KEY FEATURES OF THE ILP SUB-FUND

WHAT ARE YOU INVESTING IN?

- The ILP Sub-Fund may also invest in depository receipts [including American Depository Receipts (ADRs) and Global Depository Receipts (GDRs)], debt securities convertible into common shares, preference shares and warrants.

Investment Strategy	
<p>The first part of the process is idea generation. This is a systematic starting point where the Investment Manager uses proprietary screens across a wide investment universe applying consistent anchors around valuation and dividend yield. This allows the Investment Manager to identify high yielding stocks that are also valuation outliers, which may become investment candidates. The next stage is the fundamental analysis of these outliers. This fundamental analysis drives the Investment Manager's investment approach, and the Investment Manager employs a strong discipline around a common valuation framework firm-wide. The Investment Manager insists on challenge and debate to test the assumptions and help to achieve a level of conviction in the valuation of each security. The next stage is portfolio construction. In taking active risk, the Investment Manager considers the stock-by-stock relationships in the Fund to ensure sufficient diversification. The Investment Manager establishes an explicit link between risk and return, which reinforces the Investment Manager's ability to take long-term positions without being forced to close positions in response to volatility. The last stage is review and control. This is a team-owned responsibility involving a formal peer review of all strategies to ensure the integrity of the Investment Manager's process.</p>	<p>Refer to <i>Sch 1, Sec III – Investment Approach</i> of the FIB for further information on Investment Strategy.</p>
