KEY FEATURES OF THE ILP SUB-FUND

WHAT ARE YOU INVESTING IN?

You are investing in an ILP Sub-Fund that aims to maximise total return in the medium to long term by investing primarily in a portfolio comprising equities and equity-related securities of companies listed or to be listed on the stock exchanges of Singapore and Asia (excluding Japan) markets, and in a diversified portfolio of debt securities. The Fund has a strategic asset allocation mix of 70% equities and 30% in fixed income.

Refer to *Sch 4, Sec II – Investment Objective and Focus* of the FIB for further information on features of the ILP Sub-Fund.

Investment Strategy	
<p>The ILP Sub-Fund is managed by Eastspring's multi asset allocation team. The Fund Manager employs the following investment philosophy:</p> <ul style="list-style-type: none"> Markets are complex, dynamic systems with different factors driving asset classes. These factors and their correlations are constantly changing along with the nature of the global economic regime. Given this, the Fund Manager employs a disciplined, system but dynamic investment process to overcome behavioural biases. This process is a "Balance of Indicators" approach using data driven signals with qualitative inputs, applied pragmatically across different strategies, recognizing that no single indicator works consistently over the longer term. <p>The Fund Manager will actively manage the asset exposures to best position the portfolio utilising inputs from our proprietary Balance of Indicators approach.</p> <p>The Balance of Indicators is based on the inputs from valuation, technical and fundamental factors – giving a final composite score for each asset class pair used within the Fund, based on those factors that have provided the highest risk-adjusted returns from the library of indicators.</p>	<p>Refer to <i>Sch 4, Sec III – Investment Approach</i> of the FIB for further information on Investment Strategy.</p>
