Liquidity Risks

- **The ILP Sub-Fund is not listed and you can withdraw your units only on Business Days.**
 - There is no secondary market for the units in the ILP Sub-Fund. All withdrawal applications should be submitted to the Product Provider.
- **You may not be able to perform a withdrawal of units during any period where dealing is suspended.**
 - There may be a 10% limit on the number of units of an Underlying Fund/Underlying Entity that can be realised and converted on a Dealing Day. Therefore, your realisation request may be deferred to the next Dealing Day if realisations exceed the limit on that day. Your right to withdraw units may be temporarily suspended under certain circumstances.

Product-Specific Risks

- **You are exposed to derivatives risks.**
 - The Underlying Fund and/or the Underlying Entities may use derivative instruments, including futures, swaps, options and forwards, for efficient portfolio management and/or hedging purposes.
 - Derivatives involve risks different from, and, in some cases, greater than, the risks presented by more traditional securities investments. Some of the risks associated with derivatives are market risk, management risk, credit risk, liquidity risk, operational risk and leverage risk.
- **You are exposed to Asset Backed Securities (“ABS”) and Mortgage Backed Securities (“MBS”) risks.**
 - ABS are generally limited recourse obligations of the issuers, and holders of ABS including the Underlying Entities must rely solely on the cash flows generated from the underlying assets of the issuer and proceeds thereof (“ABS Assets”). In addition, interest payments on ABS (other than most senior tranche of an issue) are generally subject to deferral. ABS Assets are usually illiquid in nature and are subject to risks, including market, credit and interest rates risk. The aggregate return on the ABS Assets will depend in part upon the ability of the relevant investment manager to actively manage the related portfolio of the ABS Assets. The risk of ABS applies to MBS.
