KEY FEATURES OF THE ILP SUB-FUND

WHAT ARE YOU INVESTING IN?

- You are investing in an ILP Sub-Fund constituted in Singapore that aims to preserve principal value and maintain a high degree of liquidity while seeking to provide returns which are higher than those offered by Singapore dollar short term bank deposits, by investing primarily in high quality short-term money market instruments and debt securities. Such investments may include Singapore fixed interest deposits, short-term government and corporate bonds, commercial bills and deposits with financial institutions and similar assets.

Refer to *Sch 3, Sec II – Investment Objective and Focus* of the FIB for further information on features of the ILP Sub-Fund.

Investment Strategy	
<ul style="list-style-type: none"> • One of the key sources of value-add for the ILP Sub-Fund is derived from the meaningful yield pick-up generated from the Manager’s Fixed Income Team’s credit selection process. The investment decisions are generally based on detailed credit research and relative value analysis. • The ILP Sub-Fund also seeks to add value through moderate duration management. Duration levels are extended or shortened based on the fund manager’s interest rate view vis-à-vis what has been priced into the short end of the yield curve. • The Manager seeks to maintain an optimal balance between meeting redemption demands and maximising returns. Adequate liquidity is ensured through investing in short-dated papers and deposits, while terming out investments in deposits and bonds to capture incremental yield. 	<p>Refer to <i>Sch 3, Sec III – Investment Approach</i> of the FIB for further information on Investment Strategy.</p>
