Introducing **PRU**Index Lifetime Income

PRUIndex Lifetime Income is a **first-in-market**, index-linked whole life participating plan designed to help your savings go further and last longer by:

 **Capturing every Index growth** to potentially enhance your lifetime monthly income¹

 Providing **guaranteed lifetime income payout** every month

 **Safeguards your savings** from market downsides

Open doors to lifelong possibilities.
Because you and your family's future deserve more.

¹ Only applicable to the non-guaranteed Monthly Cash Benefits from the 13th month onwards. Subject to participation rate. The participation rate is not guaranteed, varies across different Indices, and is subject to the performance of the Par Fund.

Key Benefits

Grow your income

Turn your wealth into dependable and dynamic income – for life

- From 1st month, start receiving guaranteed **Monthly Cash Benefits** of 0.50% p.a.¹ for lifetime.
- From the 13th month onwards, unlock greater income opportunities. Your Monthly Cash Benefits **rides on Index growth² to deliver potential additional monthly payouts.**
- Choose your preferred Index in SGD or USD³:
 - S&P 500 FC Index⁴
 - Barclays Shiller Allocator Index⁵
 - UBS MASTR Index⁶

Note: Only the S&P 500 FC Index and Barclays Shiller Allocator Index is available to UOB customers at the point of sale.

Protect your savings

Stay confident in market downturns

With **built-in downside protection**, your policy is safeguarded by a **floor rate of 0.0%**, ensuring it never decreases in value, even in market downturns.

Tailor to your needs and beyond

A plan that evolves with your life – and supports generations to come

- Choose a currency that suits you – Singapore Dollar or United States Dollar.
- Choose a premium term that suits you – from 5, 7, 10, or 15 years.
- **Switch Index** from 4th policy year^{3,7} to suit your growth strategy.
- Accumulate income⁸ for an interest rate during payout period.
- **Support your family across generations – with income that lasts up to 380 years** with options like Wealth Share, appoint Secondary Life Assured⁹, and Change of Life Assured¹⁰.
- **Protect your family** with death and accidental death benefit.

¹ Applied to the face value and the applicable factor to derive the actual guaranteed Monthly Cash Benefit payable. | ² Subject to participation rate. The participation rate is not guaranteed, varies across different Indices, and is subject to the performance of the Par Fund. The Monthly Cash Benefit linked to the index growth from the 13th month is not guaranteed. | ³ Customer can only select one Index at any point, with 100% allocation. Indexes in SGD are for the SGD plan and Indexes in USD are for the USD plan. | ⁴ Refers to S&P 500 FC TCA 0.50% Decrement Index (SGD) ER for the SGD plan and S&P 500 FC TCA 0.50% Decrement Index (USD) ER for the USD plan. | ⁵ Refers to Shiller Barclays CAPE® Allocator 6 Dynamic Risk Control (SGD) Index for the SGD plan and Shiller Barclays CAPE® Allocator 6 Dynamic Risk Control Index for the USD plan. | ⁶ Refers to UBS Multi Asset Strategy Tactical Rotation (SGD) Index for the SGD plan and UBS Multi Asset Strategy Tactical Rotation Index for the USD plan. | ⁷ Index Redirection is allowed from 4th policy year onwards, provided policy is in-force and premiums are paid to date. It will only take effect from the segment creation of the following month, upon completion of Index Redirection application. | ⁸ The interest rate is not guaranteed and is subject to change at Prudential's discretion. | ⁹ Appointment of secondary life assured is restricted to the policy owner's immediate family members and is subject to acceptance by Prudential. | ¹⁰ Change of life assured is subject to insurable interest with current policy owner. You can choose to change the life assured to another life assured only after the premium payment term of the policy. | Product terms and conditions apply. Please refer to Product Summary for more information.

How are the lifetime Monthly Cash Benefits determined?

Guaranteed Monthly Cash Benefits

0.5% p.a. X % of Face Value² / 12 months

Non-guaranteed Monthly Cash Benefits¹

Rate of Return X % of Face Value² / 12 months

Total Monthly Cash Benefits

Monthly Payout

Positive Index Performance Rate of Return =

Index Performance X Participation Rate³

If Index Performance is 8.0% p.a. and Participation Rate³ is 60.0%, your Rate of Return is 4.8% p.a.

OR

Negative Index Performance Rate of Return =

Floor Rate of 0.0%

If Index Performance is -5.0% p.a., the floor rate of 0.0% will protect your policy from negative returns.

Let's break it down with a hypothetical example: You commit to a Regular Premium of \$60,000 p.a. for 5 years. This gives you a face value⁴ of \$300,000.

Year	Rate of Return	Face Value ⁴	% of Face Value ²	Monthly Payout
1	0.50%	300,000	20.0%	25
2	0.50%	300,000	40.0%	50
3	0.50%	300,000	60.0%	75
4	0.50%	300,000	80.0%	100
5	0.50%	300,000	100.0%	125
6 onwards	0.50%	300,000	100.0%	125

Index Performance	Participation Rate ³	Rate of Return	Face Value ⁴	% of Face Value ²	Monthly Payout
—	—	—	—	—	—
8.00%	60.0%	4.80%	300,000	20.0%	240
5.70%	60.0%	3.42%	300,000	40.0%	342
-3.00%	55.0%	0.00%	300,000	60.0%	0
5.70%	60.0%	3.42%	300,000	80.0%	684
5.00%	60.0%	3.00%	300,000	100.0%	750

Tap market opportunities with **monthly** segments creation

A structured way to grow your income while cushioning your savings from market downturns.

Avoid timing the market

Smooth out your income

Capture market upside, shielding you from downturns

It’s like planting 12 seeds a year – one every month, watch them grow over the next 12 months and harvest the fruits at the end of period.

Monthly segments and floor rate ensures that you enjoy
resilient income and a shield from negative market performance.

For illustrative purposes only and does not reflect the actual performance of your policy. The illustration above uses a hypothetical Index performance to explain what happens when a new segment is created every month over a period of one year. The participation rate is not guaranteed, varies across different Indices, and is subject to the performance of the Par Fund.

Choose an Index that aligns with your investment preference¹

	S&P 500 FC Index ²	Barclays Shiller Allocator Index ²	UBS MASTR Index ²
About	Provides dynamic exposure to US large-cap equities with advanced intraday volatility control to increase index stability and performance.	Provide exposure to undervalued US sectors using a modified version of the CAPE® Ratio, and US Treasuries.	A diversified multi-asset Index across global (US, EU, Japan) equities, bonds, and up to 22 commodities (excluding precious metals).
Index Features			
Focus	US large-cap equities	Undervalued US sectors and US Treasuries	Global equities, bonds, and commodities
Volatility	Moderate-High	Moderate	Moderate
Risk Control (volatility target)	11.5%	6.0%	Each equity, bond, commodity leg: 5.0% Overall Index target: 6.0%
Customer Suitability			
Objectives	▪ Seeking broad US equity market exposure ▪ Seeking growth-oriented investment strategy ▪ Willing to accept higher volatility in returns	▪ Seeking exposure and diversification within US ▪ Seeking a balanced investment strategy ▪ Seeking more consistent returns and moderate risk	▪ Seeking global exposure and diversification ▪ Seeking a balanced investment strategy ▪ Seeking more consistent returns and moderate risk

Note: Only the S&P 500 FC Index and Barclays Shiller Allocator Index is available to UOB customers at the point of sale.

¹ Customer can only select one Index at any point, with 100% allocation to it.

² Available in SGD or USD. Indexes in SGD are for the SGD plan and Indexes in USD are for the USD plan

Gain optimised exposure to S&P 500

The **S&P 500 FC Index** aims to provide optimised exposure to the **S&P 500** which is widely regarded as the best single gauge of large-cap U.S. equities, including 500 leading companies and covers approximately 80% of available market capitalisation.

Index Live Date:
SGD - Since June 2025
USD - Since June 2023

Customer Risk Profile:
C3 Moderate
Index Risk Classification:
C3 Moderate

How does the Index improve stability and performance?
Dynamically adjusts exposure to the S&P 500 throughout the day depending on its volatility.

Key Highlights

 Provide exposure to large-cap US equities

 Manage exposure to large drawdowns

 Systematically stabilize volatility throughout the trading day

Targeted Annualised Volatility¹:

An innovative, dynamic global index

The **UBS MASTR Index** aims to provide a diversified and global exposure to equities, bonds and commodities to generate returns by adjusting its asset allocation using an economic growth momentum signal to adapt to market conditions with agility.

Index Live Date:
SGD - Since February 2025
USD - Since December 2022

Customer Risk Profile:
C3 Moderate
Index Risk Classification:
C3 Moderate

Key Highlights

Diversified global asset classes

By investing in a broad mix of asset classes worldwide, the Index’s diversification approach aims to reduce risk and improve potential returns.

Aims to capture growth opportunities

The Index uses economic growth momentum signal to adjust its asset allocation according to changing market conditions with agility.

Built in risk management

The Index employs a multi-layer risk control mechanics to dynamically adjust exposure within each asset class and the Index for stable performance.

To find out more about the Index, visit ubs.com/ubsmastr.

Index components provide diversified exposure

Diversified exposure to Global Equities, Global Bonds and Commodities while frequently adapting to changes in the economy through early estimates of key macro economic indicators

Note: Only the S&P 500 FC Index and Barclays Shiller Allocator Index is available to UOB customers at the point of sale.
Source: UBS. For illustrative purposes only.

How does the Index work?

Determine the economy outlook

Every month, the UBS Evidence Lab (part of the UBS research) publishes early forecast of key monthly US economic indicators¹ ahead of official government data release cycles, and risk budgets are set for Acceleration, Stability and Deceleration states.

Key monthly US economic indicators

Growth momentum Nowcast

Target risk budget

Set Target Allocations

Target Allocations within equities, bonds and commodities are calculated based on their target risk budgets.

The sum of the Target Allocations is equal to 100% and constitute the Index Portfolio.

Volatility control for stable performance

A multi-layer volatility control is applied at 2 levels:

1. Index sub-components:

Maintain the volatility of equity indices and commodity Index at 5% target level.

Within Bonds, each of its sub-components exposure is determined by the respective country's rates environment through the Index's risk budgeting. Bond exposure is reduced in a rising rates environment while allowing for bond allocation in a declining rates environment.

2. Top-level Index:

Maintain the overall Index volatility at 6% target level.

If volatility is above 6%²:

Not Invested

Exposure to Index Portfolio less than 100%

Protect Index from large drawdowns and improve long-term growth potential

If volatility is below 6%²:

Exposure to Index Portfolio greater than 100%

Capitalise on growth and upside potential

Note: Only the S&P 500 FC Index and Barclays Shiller Allocator Index is available to UOB customers at the point of sale.

Source: UBS. To find out more about the Index, visit ubs.com/ubsmatr.

¹ Nowcast of economic indicators are produced by UBS Evidence Lab, leveraging non-traditional data.

² The chart is for illustrative purposes only. The allocation to each asset class that constitute the Index Portfolio may change when it is rebalanced on a monthly basis.

Backtested Index Performance (SGD) – UBS Multi Asset Strategy Tactical Rotation (SGD) Index

Note: Only the S&P 500 FC Index and Barclays Shiller Allocator Index is available to UOB customers at the point of sale. This is for illustration purpose only and does not reflect the actual performance of your policy.

¹ All Index data is based on backtested simulated annual performance data provided as an illustration of how the Index would have performed during the relevant period had the Index administrator been calculating the Index using the current Index methodology. Past performance is not necessarily indicative of future returns. The Index is constructed to be excess return exposure and is net of transaction costs and Index fees. As the Index tracks the performance of equity Index futures, government bond futures and commodity futures, there will be impact from interest rate changes as reflected in the futures prices in respective markets. Please refer to the Index disclaimers for important information relating to the backtested performance at the end of the document.

FAQs

Q:

Why does my risk profile need to be C3 moderate and above to purchase the policy for a participating plan?

For **PRU**Index Lifetime Income, your investment is exposed to the Index's risk and performance which affects your Index-linked Monthly Cash Benefit payout and potentially receiving no Index-linked payout at all from the 13th month onwards.

Therefore, given the underlying Index's risk profile is C3 moderate risk, your risk profile also must be C3 moderate or above to purchase this policy.

Q:

Why do the Indices need to be in SGD and will currency conversion compromise on the Index performance?

The non-SGD returns of the underlying Indices are converted into SGD returns by the Index provider daily with currency exposure limited to the 1-day exchange rate movement. Returns of the Index can therefore be impacted positively or negatively by daily foreign exchange rate movements. For clarity, the daily intraday exchange rate movement is unhedged. It is appropriate for the Index to provide SGD returns given that **PRU**Index Lifetime Income is a SGD-denominated policy with non-guaranteed Monthly Cash Benefit payout paid out in SGD. This also means that you do not have to worry about converting currencies on your own.

Q:

What happens if the Index underperforms during my policy term?

While the Indices are designed to adapt to market conditions, its performance can vary. If an Index underperforms, the Index-linked Monthly Cash Benefit from the 13th month may be lower or potentially zero. However, **PRU**Index Lifetime Income ensures your policy is protected with a floor rate of 0% providing protection against negative Index performance.

FAQs

Q:

What is Participation Rate?

The participation rate tells you how much of the index growth is passed on to your policy.

Your policies non-guaranteed monthly cash benefits is linked to a market index, and Prudential uses financial tools called “options” to give you the potential upside from index growth, while protecting your capital.

For example, if the index grows 8.0% p.a. and your participation rate is 60%, your policy will receive a Rate of Return of 4.8% p.a.. This approach gives you access to growth while managing downside risk.

Q:

How is Participation Rate calculated and why is it not 100%?

Participation Rate is non-guaranteed and may differ for different segments. It is influenced by two key factors:

(a) Returns from the Participating Fund:

Your premiums are invested in a participating fund that earns returns over time. From these returns, Prudential declare a budget that is used to purchase “options” to provide your policy index linked returns. Returns of the Participating Fund depend on financial markets. When financial markets are strong, the fund may generate higher returns – allowing for higher participation rate, and vice versa.

(b) Option price of the market Index:

Option price refers to how much it costs the insurer to buy options for your chosen index. Option price may vary due to market volatility and other financial market movements.

Prudential uses the budget from the Participating Fund to buy options that provide upside exposure to the chosen index. If option prices are low, more of the index return can be passed to you — resulting in a higher participation rate. If option prices are high (due to market volatility or other factors), more of the budget goes toward securing that upside protection — leading to a lower participation rate.

How they work together:

- Higher Participating Fund Returns and/or Lower Option Prices = Higher Participation Rate
- Lower Par Fund Returns and/or Higher Option Prices = Lower Participation Rate

Different products will have different benefits, illustrations, option budgets as well as illustrated participation rates. For more information on the individual product, do refer to the product summary.

FAQs

Q:

If I choose to accumulate my Monthly Cash Benefit, can the amount be reinvested and participate in the Index performance?

No, the amount cannot be reinvested. All Cash Benefit will be accumulated in the policy with a non-guaranteed interest rate¹ that will be accrued daily and compounded yearly.

Q:

Is my premium invested directly into the Index?

No, your premiums are not directly invested in the Index. Instead, premiums are placed in our participating funds that invest in bonds and derivatives. Index exposure is obtained via derivatives.

Q:

Why is the participation rate for the same Index different from another Index-linked participating plan from Prudential?

Product structures differ across each offering. Each product has its own tailored budget to buy the index exposure. For the same index, the higher the budget, the higher the participation rate, and vice versa.

¹ Subject to current prevailing rate.

S&P Index Backtested Data Disclaimers

All information presented prior to an index’s Launch Date is hypothetical (back-tested), not actual performance, and is based on the index methodology in effect on the index launch date. However, when creating back-tested history for periods of market anomalies or other periods that do not reflect the general current market environment, index methodology rules may be relaxed to capture a large enough universe of securities to simulate the target market the index is designed to measure or strategy the index is designed to capture. For example, market capitalization and liquidity thresholds may be reduced. In addition, forks have not been factored into the back-test data with respect to the S&P Cryptocurrency Indices. For the S&P Cryptocurrency Top 5 & 10 Equal Weight Indices, the custody element of the methodology was not considered; the back-test history is based on the index constituents that meet the custody element as of the Launch Date. Complete index methodology details are available at www.spglobal.com/spdji. Back-tested performance reflects application of an index methodology and selection of index constituents with the benefit of hindsight and knowledge of factors that may have positively affected its performance, cannot account for all financial risk that may affect results and may be considered to reflect survivor/look ahead bias. Actual returns may differ significantly from, and be lower than, back-tested returns. Past performance is not an indication or guarantee of future results.

Please refer to the methodology for the Index for more details about the index, including the manner in which it is rebalanced, the timing of such rebalancing, criteria for additions and deletions, as well as all index calculations. Back-tested performance is for use with institutions only; not for use with retail investors. S&P Dow Jones Indices defines various dates to assist our clients in providing transparency. The First Value Date is the first day for which there is a calculated value (either live or back-tested) for a given index. The Base Date is the date at which the index is set to a fixed value for calculation purposes. The Launch Date designates the date when the values of an index are first considered live: index values provided for any date or time period prior to the index’s Launch Date are considered back-tested. S&P Dow Jones Indices defines the Launch Date as the date by which the values of an index are known to have been released to the public, for example via the company’s public website or its data feed to external parties. For Dow Jones-branded indices introduced prior to May 31, 2013, the Launch Date (which prior to May 31, 2013, was termed “Date of introduction”) is set at a date upon which no further changes were permitted to be made to the index methodology, but that may have been prior to the Index’s public release date.

S&P Disclaimer

S&P Index Backtested Data Disclaimers (cont'd)

Typically, when S&P DJI creates back-tested index data, S&P DJI uses actual historical constituent-level data (e.g., historical price, market capitalization, and corporate action data) in its calculations. As ESG investing is still in early stages of development, certain datapoints used to calculate S&P DJI's ESG indices may not be available for the entire desired period of back-tested history. The same data availability issue could be true for other indices as well. In cases when actual data is not available for all relevant historical periods, S&P DJI may employ a process of using "Backward Data Assumption" (or pulling back) of ESG data for the calculation of back-tested historical performance. "Backward Data Assumption" is a process that applies the earliest actual live data point available for an index constituent company to all prior historical instances in the index performance. For example, Backward Data Assumption inherently assumes that companies currently not involved in a specific business activity (also known as "product involvement") were never involved historically and similarly also assumes that companies currently involved in a specific business activity were involved historically too. The Backward Data Assumption allows the hypothetical back-test to be extended over more historical years than would be feasible using only actual data. For more information on "Backward Data Assumption" please refer to the FAQ. The methodology and factsheets of any index that employs backward assumption in the back-tested history will explicitly state so. The methodology will include an Appendix with a table setting forth the specific data points and relevant time period for which backward projected data was used.

Index returns shown do not represent the results of actual trading of investable assets/securities. S&P Dow Jones Indices maintains the index and calculates the index levels and performance shown or discussed but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the Index or investment funds that are intended to track the performance of the Index. The imposition of these fees and charges would cause actual and back-tested performance of the securities/fund to be lower than the Index performance shown. As a simple example, if an index returned 10% on a US \$100,000 investment for a 12-month period (or US \$10,000) and an actual asset-based fee of 1.5% was imposed at the end of the period on the investment plus accrued interest (or US \$1,650), the net return would be 8.35% (or US \$8,350) for the year. Over a three-year period, an annual 1.5% fee taken at year end with an assumed 10% return per year would result in a cumulative gross return of 33.10%, a total fee of US \$5,375, and a cumulative net return of 27.2% (or US \$27,200).

The Shiller Barclays CAPE® Allocator 6 Dynamic Risk Control (SGD) Index (the 'Index') and Shiller Barclays CAPE® Allocator 6 Dynamic Risk Control Index (the 'Indexes'), together with any Barclays indices that are components of the Indexes, are a trademark owned by Barclays and, together with any component indices and index data, is licensed for use by Prudential Assurance Company Singapore (Pte) Ltd. ("Prudential") as the issuer or producer of **PRU**Index Lifetime Income (the 'Issuer').

Barclays' only relationship with the Issuer in respect of the Indexes is the licensing of the Indexes, which is administered, compiled and published by BB PLC in its role as the index sponsor (the 'Index Sponsor') without regard to the Issuer or the **PRU**Index Lifetime Income or investors in the **PRU**Index Lifetime Income. Additionally, Prudential as issuer or producer of **PRU**Index Lifetime Income may for itself execute transaction(s) with Barclays in or relating to the Indexes in connection **PRU**Index Lifetime Income. Investors acquire **PRU**Index Lifetime Income from Prudential and investors neither acquire any interest in the Indexes nor enter into any relationship of any kind whatsoever with Barclays upon making an investment in **PRU**Index Lifetime Income. The **PRU**Index Lifetime Income is not sponsored, endorsed, sold or promoted by Barclays and Barclays makes no representation regarding the advisability of the **PRU**Index Lifetime Income or use of the Indexes or any data included therein. Barclays shall not be liable in any way to the Issuer, investors or to other third parties in respect of the use or accuracy of the Indexes or any data included therein.

Barclays Index Backtested Data Disclaimers

Barclays Index Administration ("BINDA"), a distinct function within BB PLC, is responsible for day-to-day governance of BB PLC's activities as Index Sponsor.

To protect the integrity of Barclays' indices, BB PLC has in place a control framework designed to identify and remove and/or mitigate (as appropriate) conflicts of interest. Within the control framework, BINDA has the following specific responsibilities:

- oversight of any third party index calculation agent;
- acting as approvals body for index lifecycle events (index launch, change and retirement); and
- resolving unforeseen index calculation issues where discretion or interpretation may be required (for example: upon the occurrence of market disruption events).

To promote the independence of BINDA, the function is operationally separate from BB PLC's sales, trading and structuring desks, investment managers, and other business units that have, or may be perceived to have, interests that may conflict with the independence or integrity of Barclays' indices.

Barclays Disclaimer

Barclays Index Backtested Data Disclaimers (cont'd)

Notwithstanding the foregoing, potential conflicts of interest exist as a consequence of BB PLC providing indices alongside its other businesses. Please note the following in relation to Barclays' indices:

- BB PLC may act in multiple capacities with respect to a particular index including, but not limited to, functioning as index sponsor, index administrator, index owner and licensor.
- Sales, trading or structuring desks in BB PLC may launch products linked to the performance of a index. These products are typically hedged by BB PLC's trading desks. In hedging an index, a trading desk may purchase or sell constituents of that index. These purchases or sales may affect the prices of the index constituents which could in turn affect the level of that index.
- BB PLC may establish investment funds that track an index or otherwise use an index for portfolio or asset allocation decisions.

The Index Sponsor is under no obligation to continue the administration, compilation and publication of the **PRU**Index Lifetime Income or the level of the **PRU**Index Lifetime Income. While the Index Sponsor currently employs the methodology ascribed to the **PRU**Index Lifetime Income (and application of such methodology shall be conclusive and binding), no assurance can be given that market, regulatory, juridical, financial, fiscal or other circumstances (including, but not limited to, any changes to or any suspension or termination of or any other events affecting any constituent within the Index) will not arise that would, in the view of the Index Sponsor, necessitate an adjustment, modification or change of such methodology. In certain circumstances, the Index Sponsor may suspend or terminate the **PRU**Index Lifetime Income. The Index Sponsor has appointed a third-party agent (the 'Index Calculation Agent') to calculate and maintain the **PRU**Index Lifetime Income. While the Index Sponsor is responsible for the operation of the **PRU**Index Lifetime Income, certain aspects have thus been outsourced to the Index Calculation Agent.

The Shiller Barclays Indices have been developed in part by RSBB-I, LLC, the research principal of which is Robert J. Shiller. RSBB-I, LLC is not an investment advisor, and does not guarantee the accuracy or completeness of the Shiller Barclays Indices or any data or methodology either included therein or upon which it is based. Neither RSBB-I, LLC nor Robert J. Shiller or any of their respective partners, employees, subcontractors, agents, suppliers and vendors (collectively, the "Protected Parties"), shall have any liability, whether caused by the negligence of a Protected Party or otherwise, for any errors, omissions, or interruptions therein, and make no warranties, express or implied, as to performance or results experienced by any party from the use of any information included therein or upon which it is based, and expressly disclaim all warranties of merchantability or fitness for a particular purpose with respect thereto, and shall not be liable for any claims or losses of any nature in connection with the use of such information, including but not limited to, lost profits or punitive or consequential damages, even if RSBB-I, LLC, Robert J. Shiller or any Protected Party is advised of the possibility of same.

UBS Disclaimer

UBS AG AND ITS AFFILIATES (“UBS”) DO NOT SPONSOR, ENDORSE, SELL, OR PROMOTE PRUINDEX LIFETIME INCOME (THE “PRODUCT”). A DECISION TO PURCHASE THE PRODUCT SHOULD NOT BE MADE IN RELIANCE ON ANY OF THE STATEMENTS SET FORTH IN THIS DOCUMENT. PROSPECTIVE INVESTORS ARE ADVISED TO PURCHASE THE PRODUCT ONLY AFTER CAREFULLY CONSIDERING THE RISKS ASSOCIATED WITH PURCHASING THE PRODUCT, AS DETAILED IN ANY PRODUCT INFORMATION THAT IS PREPARED BY OR ON BEHALF OF PRUDENTIAL ASSURANCE COMPANY SINGAPORE (PTE) LTD. UBS Index Backtested Data Disclaimers

THIS MATERIAL CONTAINS DATA DERIVED AS A RESULT OF BACK-TESTING OF DATA AND IS PROVIDED BY UBS IN GOOD FAITH USING UBS’S STANDARD METHODOLOGY FOR INFORMATION OF THIS KIND. THAT METHODOLOGY RELIES ON PROPRIETARY MODELS, EMPIRICAL DATA, ASSUMPTIONS AND SUCH OTHER INFORMATION THAT UBS BELIEVES TO BE ACCURATE AND REASONABLE. THE CURRENT DATA THAT UBS SELECTED FOR PREPARATION OF THIS MATERIAL MAY BE SUBSTANTIALLY DIFFERENT THAN IF THE DATA WAS SELECTED FROM A DIFFERENT TIME PERIOD AND THIS MAY HAVE A SUBSTANTIAL IMPACT ON THE BACK-TESTING RESULTS.

UBS MAKES NO REPRESENTATION AS TO THE ACCURACY, COMPLETENESS OR APPROPRIATENESS OF SUCH METHODOLOGY AND ACCEPT NO LIABILITY FOR YOUR USE OF THE INFORMATION. THERE IS NO ASSURANCE THAT OTHER BANKS OR BROKERS WOULD DERIVE THE SAME RESULTS FOR THE BACK-TEST PERIOD OR THAT SUCH RESULTS WOULD HAVE BEEN ACHIEVED IN PRACTICE.

PROSPECTIVE INVESTRS SHOULD ALSO NOTE THAT BACK-TESTING RESULTS MAY PROJECT UNREALISTIC EXPECTATIONS ON THE PERFORMANCE OF THE RELEVANT INSTRUMENT. PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS. THE BACK-TESTING RESULTS DO NOT ACCOUNT FOR THE RISKS INVOLVED IN INVESTING IN THE RELEVANT INSTRUMENT, INCLUDING BUT NOT LIMITED TO THE CREDIT RISK OF THE ISSUER OF THE INSTRUMENT. THESE RISKS MAY LEAD TO THE LOSS OF ANY INVESTORS' INVESTMENT IN THE RELEVANT INSTRUMENT.
